

Dynamic Duo Kit

Ultra High pH, Heavy-Duty Detergent / Degreaser

Product Description

Dynamic Duo is an ultra high pH, heavy-duty detergent and degreaser engineered to attack grease, grime, soil or any other unwanted contaminants associated with high or low pressure cleaning applications. Dynamic Duo is a super concentrated chemistry capable of cleaning and degreasing industrial / commercial equipment, tankers, trucks, buses, and farm vehicles. Dynamic Duo will leave a streak free finish, brighter paint, clearer glass, and shiny wheels. Dynamic Duo is also extremely effective for removing tenacious "road film".

Performance Features

- Biodegradable and Environmentally Green
- Quickly Removes Grease, Oils, and Road Film
- Contains NO Harmful Glycol Ethers, Phosphates, HAP's, Or VOC's.
- Super Concentrated Formula For Low Volume Usage And Low Cost
- Packaged As An EZ Kit To Eliminate High Freight Costs and Storage / Handling Requirements

Physical Specifications

Physical State	Liquid
Appearance	Green
Rinseability	Excellent
% VOC / HAP	0%
pH (Use Dilution)	≈ 13.5

Equipment Requirements

Dynamic Duo is safe for use with all standard cleaning equipment.

Product Make-Up

Dynamic Duo is packaged as a super-concentrated EZ Kit containing 2 - 2.5 gallon jugs. Mix both jugs together with 25 gallons of water to produce 30 gallons of super-concentrated Dynamic Duo.

Technical Data Sheet

Concentration and Application Methods

Vehicle Washing

SPONGE, BRUSH & BUCKET: For typical vehicle, truck or equipment washing, add 5% - 10% by volume of Dynamic Duo to a water-filled bucket at a temperature between 40°–160° F. Apply to surface to be cleaned with sponge or brush. Where soil deposits are heavy, let soak for 5–15 minutes and brush if possible. Follow with a thorough hose or high-pressure water rinse.

LOW OR HIGH PRESSURE SPRAYERS: Apply Dynamic Duo at a rate of 8–12 fl. ounces/gallon (ratios of 1:32–1:10). Apply to surface to be cleaned. Where soil deposits are heavy, let soak for 5–15 minutes and brush if possible. Follow with a thorough hose or high-pressure water rinse.

TWO-STEP ACID / ALKALINE EXTERIOR WASH: Use Dynamic Duo as a Step 2, high pH detergent in a two-step, acid/alkaline exterior wash. Apply Dynamic Duo at 6 - 8 fl. ounces/gallon of water through a low pressure sprayer. Allow to soak. High pressure rinse with clean water. Use Seacole's Release or The Solution as a Step 1 acid pre-soak. Refer to Seacole's Release or The Solutions technical data sheets for application recommendations.

Companion Products

Use Seacole's Release or The Solution for a two-step, acid/alkaline exterior wash.

Safety and Handling

Read and understand this products MSDS before handling.

Waste Treatment

Individual users should verify the nature of spent solutions to assure compliance with local, state, and federal regulations. Contact Seacole for specific details and/or further waste treatment recommendations.

Ordering Information

Dynamic Duo is available as an EZ Kit. Contents include 2 - 2.5 gallon jugs.
