

APF-NS

Artwork Protection Film with non-stick coating

The APF-NS Protection film is a 0.5 mil. (12 microns) thick polyester film developed to protect phototools used in conjunction with liquid solder resists but is also ideal for primary image films. The smooth, non-stick coating prevents particles of photo resist from adhering to the phototool, while minimizing the need for cleaning and inspection. Ideal for track and gap widths down to 0.3 mil (8 microns). The film is completely removable without leaving any adhesive residue.

Production Specifications:

	<u>micron</u>	<u>mil</u>
Film Thickness	12	0.5
Adhesive Thickness	5	0.2
Release Liner thickness	25	1.00
Adhesive:	removable, optically clear, UV stable, acrylic.	

Roll Widths:

457 mm. (18 in), 508 mm. (20 in), 610 mm. (24 in).

Standard Roll Lengths:

91 meters (300 ft)
